SMEThermal 2013

29 January 2013

Beletage – Conference Center Heinrich-Böll-Stiftung, Berlin

One step ahead!

SMEThermal 2013 is Europe's leading international industry conference on the solar thermal sector. The one-day event offers unique insights into the sector's most recent developments, whether in process optimisation, cost reduction strategies, new materials or the design of collectors and tanks. More than 180 companies from all over the world are expected to participate.

SMEThermal 2013 Hot Topics:

- ▶ Solar system in 2020 – what will collectors and tanks look like?
- ▶ Pros and cons of different materials and processes
- ▶ What the financial sector expects from the industry
- ▶ Standards and certification – on the way to international harmonisation
- ▶ Market outlook in and outside Europe

Don't miss out on the unique opportunity to gain valuable knowledge and meet new international contacts.

Call for Papers

We invite all component manufacturers, production equipment suppliers, material suppliers, engineering companies, researchers and other experts to propose presentations for the SMEThermal 2013. Each abstract should contain a one-page explanation of the key issues to be covered in the presentation and be accompanied by a short biographical text about the author.

The Call for Papers will be opened from June 10 to August 31.

Online submission of your abstract:
www.solarpraxis.de/en/conferences

Key Topics

Submitted papers should address at least one of the following topics related to the manufacturing of tanks, absorbers and collectors, as well as to technological trends and international market prospects:

- ▶ Innovations in manufacturing, product design and machinery
- ▶ How to increase competitiveness and reduce costs
- ▶ Pros and cons of new materials
- ▶ Technology trends on world market
- ▶ Future outlook on product design
- ▶ Trends in standards and certifications
- ▶ Overview of new and available supplies

Be part of the SMEThermal 2013 – the only forum for the solar thermal industry. Five good reasons why:

- Excellent networking – Meet the Who's Who of the global solar thermal industry
- Great opportunities – Specialists from material and machinery suppliers present their latest innovations
- Global perspective – International CEO panels share insights into future technologies and market forecasts
- New technologies – Innovation forum presents latest developments in process optimisation and new materials
- Market mood – First international industry meeting in 2013 acts as business barometer in the new year
